DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 50-103 are rejected under 35 U.S.C. 102(b) as being anticipated by Peck (US 4862529).

Peck discloses bed comprising a track, supporting elements on said track, and moveably coupled thereto, and comprising: a back section; a buttocks section; and a thigh/calve section, said supporting elements being pivotably connected to each other at abutting edges; and a linear actuator coupled to the supporting elements, said back section being coupled to said track section and configured to move an end portion thereof vertically in a vertical plane when said linear actuator is activated, such that when said back section is raised or lowered, said end portion remains substantially the same distance from an adjacent wall, and wherein said thigh-calve section reclines pivotally below a horizontal plane of the buttocks section in a downward direction pivotally about an adjoining edge with the buttocks section (see abstract, see Figs. 2,3).
